## 2. HAZARDS IDENTIFICATION

|  | Emergency Overview  |   |
|--|---|---|
|  | May cause allergic skin reaction  |   |
|  | Harmful by inhalation, in contact with skin and if sw                         | vallowed                                    |
| May o  | ause thyroid damage after repeated exposure based                             | l on animal data.                           |
| CAUTION  |   |   |
| Appearance Yellow.   | Physical State Solid.   | Odor Slight. Rotten egg-like.               |
| Potential Health Effects   |   |   |
| - Inhalation   |   |   |
| - Inhalation<br>- Skin contact   | ure may cause adverse effects on the thyroid.                                 |   |
| - Inhalation<br>- Skin contact   | ure may cause adverse effects on the thyroid.<br>May cause slight irritation. |   |
| - Inhalation<br>- Skin contact<br>- Repeated or long-term expos                | , ,   | llergic reactions with susceptible persons. |
| - Inhalation<br>- Skin contact<br>- Repeated or long-term expos<br><b>Eyes</b> | May cause slight irritation.  | lergic reactions with susceptible persons.  |

## **3. COMPOSITION/INFORMATION ON INGREDIENTS**

## Ingredients Name

| Chemical Name     | CAS-No    | Weight % | OSHA PEL |
|-------------------|-----------|----------|----------|
| Mancozeb          | 8018-01-7 | 75       | N/A      |
| Ethylene thiourea | 96-45-7   | 0-0.1    | N/A      |

|                    | 4. FIRST AID MEASURES  |
|--------------------|--|
| Eye Contact        | Hold eye open and rinse slowly and gently with water for 15 - 20 minutes.<br>Remove contact lenses, if present, after 5 minutes, then continue rinsing eye<br>Call a poison control center or doctor for treatment advice.             |
| Skin Contact       | Take off contaminated clothing<br>Rinse skin immediately with plenty of water for 15-20 minutes<br>Call poison control center or doctor for treatment advice.  |
| Inhalation         | If breathing is irregular or stopped, administer artificial respiration<br>May cause allergic respiratory reaction<br>Call a poison control center or doctor for further treatment advice.   |
| Ingestion          | Call a physician or poison control center immediately<br>May produce an allergic reaction<br>Do not induce vomiting unless told to do so by a poison control center or doctor<br>Never give anything by mouth to an unconscious person |
| Notes to Physician | No information available   |
|                    | 5. FIRE-FIGHTING MEASURES  |

Flammable Explosive Properties

| Flash Point<br>Autoignition Temperature<br>205 C / 401 F |   | Not available  |                |
|--|---|--|----------------|
| Flammability Limits in Air                               |   | 0.29 g/L (% by volume in air)  |                |
| Extnguishing Media                                       |   | Use: Carbon dioxide (CO2) Foam Dry chemical If becomes wetted or damp it can produce heat and over time, to become a fire hazard.  |                |
| Fire/Explosion Hazard                                    |   | Firefighters and others who may be exposed to pro-<br>combustion should wear full fire fighting turn out ge<br>self-contained breathing apparatus. Fire fighting e<br>should be thoroughly decontaminated after use. | ear and        |
| Hazardous Combustion Products                            |   | Carbon disulfide, ethylene thiourea (ETU), Sulfur of nitrogen, Oxides of carbon.   | oxides, Oxides |
| NFPA Heal  | th 1  | Flammability 1   | Instability 1  |
|  | 6. ACCIDENTAL RI  | ELEASE MEASURES  |                |
| Personal Precautions                                     | Avoid contact with skir   | n, eyes and clothing. Use personal protective e  | quipment.      |
| Environmental Precautions                                | Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinenet environmental permits. Do not flush into surface water or sanitary sewer system. |  | ous waste      |
| Methods for Clean-up                                     | Sweep up and shovel   | into suitable containers for disposal.   |                |
|  | 7. HANDLING   | AND STORAGE  |                |
| Handling   | Avoid breathing dust. Keep out of reach of children. Avoid contact with skin, eyes and clothing. Ensure adequate ventilation. Keep away from heat, sparks and open flame No smoking.  |  |                |
| Storage  |   | e cross-contamination with pesticides, fertilizers<br>f allowed to become wet the product will deterion.<br>I.   |                |

-

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

#### Exposure Guidelines

| Engineering Controls          | Investigate engineering techniques to reduce exposures. Local mechanical exhaust ventilation is preferred. Consult ACGIH ventilation manual or NFPA Standard 91 for design of exhaust systems. PESTICIDE APPLICATORS & WORKERS. THESE WORKERS MUST REFER TO PRODUCT LABELING AND DIRECTIONS FOR USE IN ACCORDANCE WITH EPA WORKER PROTECTION STANDARD 40 CFR PART 170.  |
|-------------------------------|---|
| Personal Protective Equipment |   |
| Eye/face Protection           | Avoid contact with eyes. Goggles.   |
| Skin Protection               | Rubber gloves. Wear protective gloves/clothing.   |
| Respiratory Protection        | Where airborne exposure is likely, use NIOSH approved respiratory protection equipment<br>appropriate to the material and/or its components. Full facepiece equipment is<br>recommended and, if used, replaces need for face shield and/or chemical goggles. If<br>exposures cannot be kept at a minimum with engineering controls, consult respirator<br>manufacturer to determine appropriate type equipment for given application. Observe<br>respirator use limitations specified by NIOSH or the manufacturer. For emergency and<br>other conditions where there may be a potential for significant exposure, use an approved<br>full face positive-pressure, self-contained breathing apparatus. Respiratory protection<br>programs must comply with 29 CFR 1910.134. |

#### **General Hygiene Considerations**

Handle in accordance with good industrial hygiene and safety practice.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

- Appearance Physical State Boiling Point/Range Specific Gravity Evaporation Rate Vapor Density Viscosity Bulk Density Percent Volatiles
- Yellow Solid Not available Not available Not available Not available 40-45 lb/cu ft Not available
- Odor pH Melting Point/Range Solubility Vapor pressure VOC Content Molecular Weight Percent Solids
- Slight Rotten egg-like no data available Not available Not available Not available Not available no data available Not available

## **10. STABILITY AND REACTIVITY**

| Stability                               | Stable under normal conditions  |  |  |
|---|---|--|--|
| Conditions to Avoid                     | To avoid thermal decomposition, do not overheat Keep away from children |  |  |
| Incompatible Materials                  | Strong oxidizing agents Acids   |  |  |
| Hazardous Decomposition Products        | Oxides of carbon and nitrogen Hydrogen sulfide                          |  |  |
| Possibility of Hazardous Polymerization | Hazardous polymerisation does not occur                                 |  |  |

## 11. TOXICOLOGICAL INFORMATION

Acute Toxicity

| Product Information | Manzate Pro Stick :<br>Oral LD50 (rat) = >5,000 mg/kg<br>Dermal LD50 (rabbit) = > 2,000 mg/kg<br>Inhalation LC50 (rat) 4 hr = >5.4 mg/L  |
|---------------------|--|
|                     | Mild to moderate eye irritant. Mild to slight skin irritant. Sensitizer .  |
| Chronic Toxicity    |  |
| Carcinogenicity     | Mancozeb:<br>The effects in animals from repeated high inhalation dose of mancozeb dust equivalent to<br>150 -250 times the AEL include reduced body weight, inflammation of the lungs, and<br>abnormal thyroid function.<br>Toxic effects in animals from repeated ingestion of hgih doses of Mancozeb include<br>reduced body weight and thyroid effects. In a different study, repeated dosing caused toxic<br>and neuopathological effects in male and female rats which included compound-related<br>mortality, decreased body weight, impaired hind limb motor activity and histopathological<br>evidence of nerve damage. The no-observable effect level was 125 ppm. |
|                     | Increased incidences of thyroid tumors and ocular lesions were observed in rats<br>administered 750 ppm (equivalent to approximately 35 mg/kg/day) of mancozeb in their diet<br>for two years. Mancozeb is considered to show weak carcinogenic activity. Tests in some<br>animals indicate that mancozeb may produce embyro and fetal toxicity, but only at<br>maternally toxic doses. Multi-generation studies in animals demonstrate no reproductive<br>toxicity.   |

| Chemical Name     | ACGIH | IARC    | NTP                    | OSHA |
|-------------------|-------|---------|------------------------|------|
| Ethylene thiourea |       | Group 3 | Reasonably Anticipated | Х    |

## IARC: (International Agency for Research on Cancer)

A trace contaminant, Ethylene thiourea (ETU) a breakdown product of Maneb, has been catergorized as a probable human carcinogen by NTP.

## **12. ECOLOGICAL INFORMATION**

## Ecotoxicity

Mancozeb: Aquatic tocicity: 96 hour LC50 = rainbow trout 0.73 mg/L 96 hour LC50 = fathead minnows 0.57 mg/L 96 hour LC50 = Bluegill sunfish 0.84 mg/L

72 hour EC50 = freshwater algae = 0.43 mg/L.

## 13. DISPOSAL CONSIDERATIONS

| Waste Disposal Method  | Dispose of in accordance with local regulations. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinsate is a violation of Federal law. If the wastes cannot be disposed of by use or according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. |  |  |  |
|--|--|--|--|--|
